

# Top 5 Benefits

## of Cloud Services

*Companies that are moving to the cloud can benefit in many ways regarding reduced costs, flexibility, stability, security and collaboration.*

*Here are the Top 5 Benefits:*

### 1) Reduced Costs

Internal IT costs can be greatly reduced by paying monthly for services as your business scales, rather than a big up-front capital expense.

### 2) Flexibility

As your business grows, bandwidth and storage space will need to be updated, which can be completed seamlessly off-site.

### 3) Stability

Rather than the typical break-fix solution, routine and automatic software updates can prevent future catastrophes.

### 4) Security

With the proper security, anti-virus software, and firewall rules set in place, your data will be as safe as if it were in your own establishment.

### 5) Collaboration

Cloud services allow work to be accessed from anywhere on multiple devices, which makes it easier for employees to share data with increased mobility.
